### OUTSTANDING VALUE FOR MONEY

**MAXIFLAME** IS THE OUTSTANDING VALUE FOR MONEY LOW SMOKE BRIQUETTE  
**MAXIFLAME** IS EASY TO LIGHT, BURNS WITH AN ATTRACTIVE FLAME, AND HAS A HIGH RADIANT HEAT OUTPUT  
**MAXIFLAME** IS LOW ASH AND THEREFORE LESS WASTE IN THE ASH PAN

### HOW TO GET THE BEST OUT OF MAXIFLAME

JUST FOLLOW THESE SIMPLE HINTS TO GET THE BEST OUT OF **MAXIFLAME**

**1.** Clean away all ashes from the last fire and ensure the ash pan is empty. Any residual unburnt briquettes should be left on top of the grate to help light the next fire. Leave the ash pan out and pit cover off.

**2.** Place several pieces of firelighter on top of the grate and cover with dry kindling, in a "wigwam/campfire" arrangement around the firelighters. Open air draught controls fully. Place solid fuel around and on top of the dry kindling - leaving a gap at the front to be able to light the firelighters. Light/ignite the firelighters and wait for the fire to become established.

**3.** Once the fire is established, replace the ash pan and ash pit cover.

**4.** Top up with additional briquettes using suitable fire tongs/coal scuttle to give a deep fire bed and adjust air draught controls to obtain the required burn rate.

**5.** Keep a deep firebed of MAXIFLAME at all times. This ensures maximum radiant heat into the room and greater efficiency from your heating system.

### IMPORTANT SAFETY MESSAGE

To avoid danger of suffocation, keep this bag away from babies and children.  
Take care when lifting bags.  
Always keep chimneys and flueways clear and ensure your appliance has adequate ventilation.  
Always use a fireguard when children are present or the fire is left unattended.  
Always ensure that you use and service your solid fuel appliance in accordance with the manufacturer's recommendations.  
Always use fire tongs to charge fuel and do not wear loose clothing that could ignite.  
Do not put your head, hands or arms into the fire whilst lit.

**FOR THE VERY BEST IN HOME HEATING ALWAYS LOOK FOR THE MAXIBRITE NAME**
